

Diary Line 5: *Night of the 11th, beginning of the night, the moon was 1 cubit behind gamma Virginis, the moon being 1 cubit low to the south;*

Sunset Apr 22, -197: the moon in Virgo, 2° behind (east of) Porrima and 2° to the south.

Comments: Sunset on the night of Apr 22nd, the moon was near the star Porrima (gamma Virginis) of the constellation Virgo. TheSky computes the moon was 1° 51' behind (east of) the star and 1° 22' low to the south. The Diary entries of 2° behind and 2° south are consistent with the computed distances.
